CLASS notes

The last month of the school year is here! It's definitely a bittersweet moment but, we will go out with a BANG!

On our last day of school there will be a Club Mud party; more information about these will go home as the time gets closer. Please send your child a PLAIN WHITE T-SHIRT as soon as possible.

These shirts will be worn on the last day of school and need to be decorated ahead of time.

MONTHLY OBJECTIVES

English Language arts (ELA): The students will meet some interesting members of the animal kingdom as they learn about the invertebrates group, animals without backbones. They are also introduced to a special group of invertebrates called arthropods, and they compare them to humans. We will also continue our work on story elements and HFW.

Math: Students will model, create, and describe multiple representations that show equivalence for addition and subtraction situations with a variety of concrete objects

Science: Students observe living animals and identify their basic needs. We will also sort organisms based of physical characteristics

Social Studies: Students will an opportunity to practice problem solving skills and apply them to an appropriate problem. We will also discuss the concept of change over
